Education

Bursa Technical University 2021-2025
Bachelor of Science in Computer Science (GPA: 3.76 / 4.00) - Graduated 4th in Department *Bursa, Turkey*

Experience

Summerhomes August 2025 – Present
Full-Stack Software Developer *Alanya, Turkey*

- Managed corporate website with Next.js and integrated a Ruby-based portfolio panel into the main platform.
- Built critical modules (live chat, analytics dashboards, WhatsApp & e-mail newsletter automations) from scratch for a Laravel-based CRM web application.
- Maintained a React Native mobile app used by the sales team and ensured real-time data synchronisation with the CRM backend.
- Led DevOps operations using Coolify; configured staging & production environments, database management, and database firewall setups.

Canovate Ballistics July 2024 – July 2025
Computer Engineer *İstanbul, Turkey*

- Worked on image processing, object detection, and designing & implementing server-client architectures for live and offline data transmissions.
- Designed and developed web services with comprehensive frontend and backend API integration experience.

Projects

Orwion CRM

- Full-stack SaaS platform for hotel and IT consulting management; covers guest requests, IT ticketing, asset tracking, reservations, bar stock, proposals and more under role-based access.
- Technologies: NestJS, PostgreSQL, Prisma ORM, React, TailwindCSS, WhatsApp Cloud API, Gemini AI, Docker

WhatsApp Chat Analyzer

- Web application that analyses WhatsApp chat histories using NLP models and visualises extracted insights (sentiment, activity heatmaps, keyword frequency, wrapped-style stories).
- Technologies: Python, FastAPI, React, NLP, Hugging Face Transformers, Docker

Deepfake Video and Audio Detection | TÜBİTAK Report

- Deepfake detection system for videos and audios using deep learning; completed as a funded TÜBİTAK research project (3-person team).
- Technologies: PyTorch, Computer Vision, Deep Learning, Video Analysis

Automated Tire Text & Code Recognition | Report

- Mobile app that reads tire information (DOT codes, dimensions, speed-load ratings) from a photo, eliminating manual data entry for automotive industry workflows.
- Technologies: YOLOv11, trOCR, Transformer Models, Flutter, ML Kit, Vertex AI

Achievements

Vakıfbank Hackathon Top 14 (2024) | Google Game & App Academy (2023) | TÜBİTAK 2209-A (2023)

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, PHP, Ruby | **Web & API:** Next.js, React, Laravel, NestJS, Flask, FastAPI, HTML, CSS, REST, WebSocket | **Mobile & Desktop:** React Native, Flutter, .NET, Windows Forms | **AI/ML & Computer Vision:** YOLO, PyTorch, TensorFlow, OpenCV, Hugging Face, OCR | **Database:** PostgreSQL, MySQL, SQLite, Firebase, Redis | **DevOps & Tools:** Coolify, Docker, Git, Linux | **Languages:** English (B2)
